ACADEMIC PROJECT EXPERIENCE

Boolean operators functioning with a graphical user interface environment

Sep 2018 – oct 2018

The objective was to get comfortable with a graphical user interface environment in a python programming language through the implementation of basic boolean operators.

Car Rental System

Mar 2018 – Apr 2018

The objective of the project was to grasp knowledge about how actual car rental system works. However, it was a basic implementation of a simple car rental system using C++ programming language.

Postal Tracking System

Sep 2017 – Oct 2017

The objective was to learn and implement C programming language skills through this basic project. It dealt with maintaining a file-system of a self-assuming organization and track the order placed by the end-user.
